

U.S. South Forest Biomass: An Emerging Industry in Wood Fiber Markets

Table of Contents (Preliminary)

- Chapter 1. Executive Summary
- Chapter 2. Forest Biomass as an Emerging Market
 - 2.1 U.S. Forest Biomass Markets Characterized
 - 2.2 Woody Biomass Economic Drivers
 - 2.3 International Markets
 - 2.4 Energy Price Outlook
 - 2.5 Biomass Conversion Technology Development Trends
 - 2.6 Competing Fiber Supplies
- Chapter 3. U.S. South Forest Biomass Supplies
 - 3.1 Biomass Supply Sourcing Characterized
 - 3.2 Logging and Procurement Innovations and Adaptations
 - 3.3 Biomass Transportation Costs
 - 3.4 Operable Growing Stock Inventory
 - 3.5 Mill Residual Supplies
 - 3.6 Logging Residues and Stumps
 - 3.7 Woody Biomass Supply Summary
- Chapter 4. U.S. South Biomass Demand for Energy and Other Fiber Processing
 - 4.1 Recent Bioenergy Projects
 - 4.2 Installed Woody Biomass Capacity
 - 4.3 Energy Prices and the Influence on Biomass Industry Investment
 - 4.4 Potential Conversions to Biofuel Processing
 - 4.5 Wood Pellet Demand and Pellet Trade
 - 4.6 Roundwood and Chip Demand by Product Sector
 - 4.7 Biomass Consumption by End-use

Table of Contents (Preliminary) continued

Chapter 5. Forest Biomass Prices

5.1 Impact of Fiber Prices on Cost of Biomass Energy

5.2 Wood Fiber Prices Compared

5.3 Harvest and Delivery Costs

5.4 Softwood Biomass/Residual Prices

5.5 Hardwood Biomass/Residual Prices

Chapter 6: Risks

6.1 Public Policy and Carbon Trading

6.2 Energy Price Volatility

6.3 Biomass Technology Developments
